

Science Merit Test Organized at Bhagabati Devi Primary Teachers Training Institute on Gandhi Jayanti

West Bengal, October 2, 2026:

On the auspicious occasion of the birth anniversary of the Father of the Nation, Mahatma Gandhi, a grand educational program was organized today (**October 2, 2026**) at **Bhagabati Devi Primary Teachers Training Institute**. The event commenced at the institute's **Seminar Hall** with a solemn tribute to Gandhiji. The faculty members, staff, and students of the institute paid their respectful homage to the Mahatma, reflecting on how his life and philosophy, rooted in the ideals of truth, non-violence, and humanity, continue to guide the path of education and society.

In alignment with these noble ideals of intellectual development, the institute successfully conducted a **Science Merit Test (বিজ্ঞান মেধা অভীক্ষা)** inside the **Class Room**. The competition witnessed an enthusiastic response, with students representing around **12 different schools** actively participating in the examination to showcase their scientific acumen.

The campus saw a large gathering of supportive parents who accompanied the young participants. To ensure the smooth management of the event, the dedicated volunteers of the institute's **NSS (National Service Scheme) Unit** stepped forward. They actively assisted the visitors and distributed official invitation cards among the present parents, welcoming them to the institute's future academic endeavors.

The head of the institution expressed heartfelt gratitude to the NSS volunteers, teachers, and the organizing committee for executing the event flawlessly, while also thanking all the participating schools for making this initiative a grand success.
